40%

Reduced Breakdowns

35%

Production Efficiency

21%

Reduced Downtime

18%

Improved Compliance

*Businesses are now using mobile technology to drive through efficiency*

# TECHNOLOGY

## IN MANUFACTURING

Tablets avoid cumbersome and error prone human data entry. They eliminate human introduced errors such as in data entry by feeding in data form patient care systems.

Tablets eliminate the need to record information on paper and entry into systems. This saves time, energy, money and improves efficiency.

Paperwork minimization: Tablets help minimize the messy paperwork and the manual work flow process - again, increasing efficiency.

Voice, Video, Images and Text: The visual, multimedia (audio, video) and graphics capabilities can be leverage to record and provide on demand information such as the visual images, investigations & training.

## ONLINE TPM SYSTEMS & APPS

81%

of CEO's see mobile technologies as being strategically important for their enterprise.

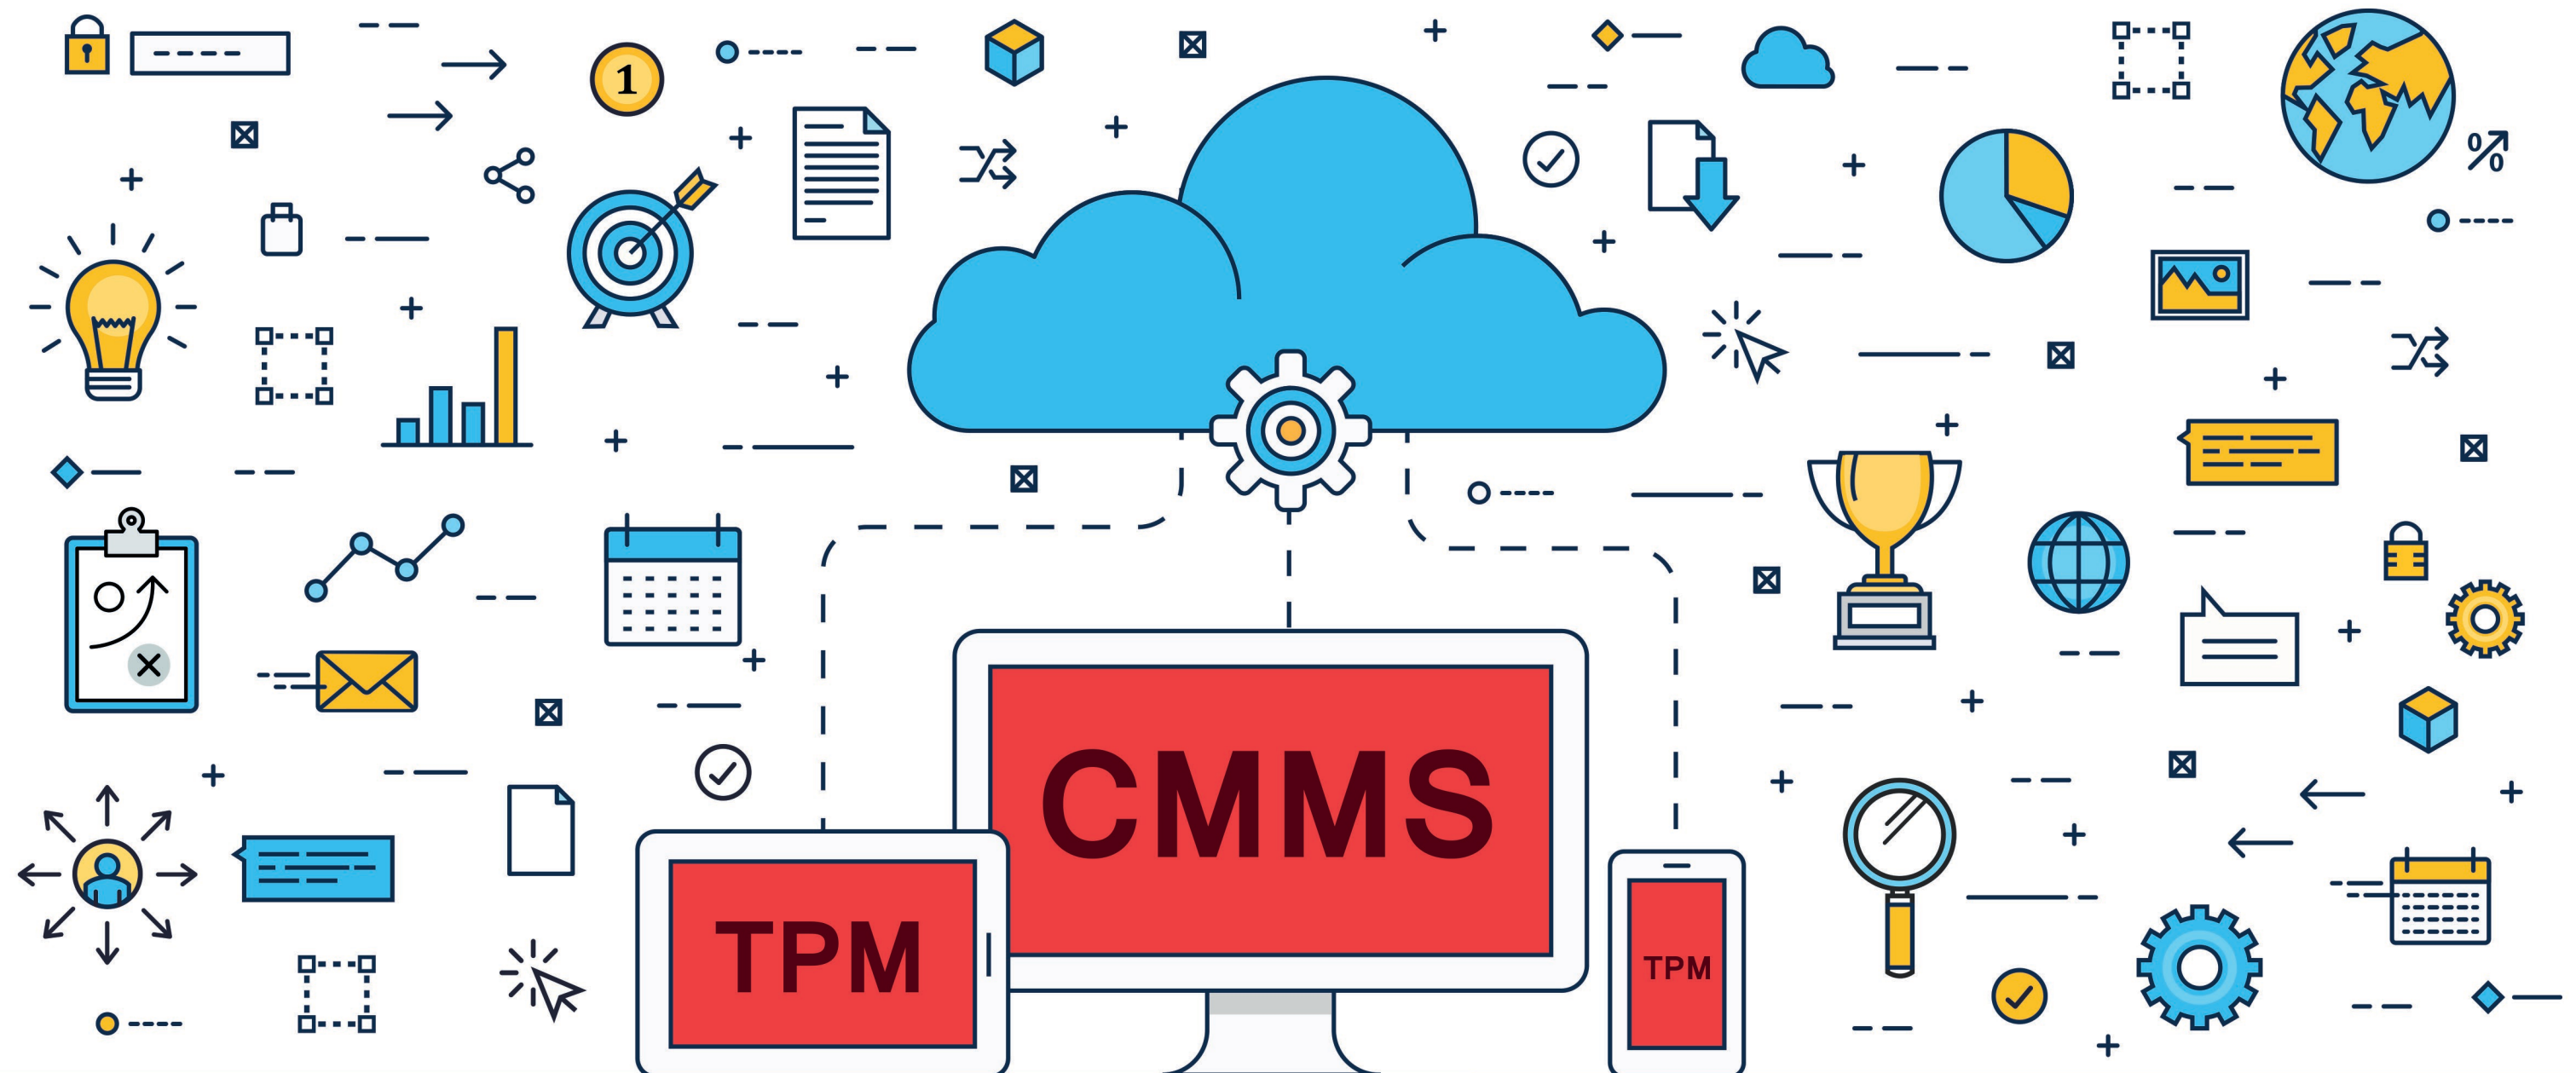

86%

of CEO's says digital technologies can create competitive advantage and is the key to success.
