Importance of Using Balanced Scorecard Software

Implementing computerised Balanced Scorecards make organisations to be

What is Computerised Balanced Scorecard (CBSC) ?

Computerised Balanced Scorecard is a software package that helps organisations to visualise your Balanced Scorecards digitally. Balanced Scorecard Software offers a central database of business information that is owned by the team for the team. It will help organisations to achieve strategic performance goals & objectives. Apart from the financial data a Balanced Scorecard measures other parameters like organisational strategy, learning and development of people, business process and customers. Typical measures include Inventory, Scrap, Delivery, Overtime, People Productivity and can also include Supplier scorecards.People Productivity and can also include Supplier scorecards.

A computerised balanced scorecard will enable management to target the right issues, driven by trend and Pareto analysis. The Safety Quality Delivery Cost (SQDC) process provides the focal point, to understand and action the issues, identified within the scorecard;

"A computerised balanced scorecard will enable management to target the right issues, driven by trend and Pareto analysis."

the scorecard uses the entire organization KPI matrix. The Scorecard and the SQDC together enable the Business to effectively link its performance trending to the continuous improvement process in order to make sure you are targeting the right issues!

- Structured
- Drives alignment
- Results driven
- Accurate data (driven from your internal systems)
- Multiple User Interaction
- Clear and Simple for Understanding Data
- Streamlined for data channels
- Digital Visual – Graphic Representation
- Eliminates Manual Process for Data Interrogation
- Interacts with current data capture so no reworks and data entries
- Strategic as well as Operationally focused

Key Benefits an Organization can achieve by using Balanced Scorecard Software

How Computerised Balanced Scorecard will help you?
